

Audio-Visual Equipment Services

Allow our Executive Meetings Manager to assist you in selecting the appropriate equipment for your speaker's presentations. Many factors come in to play when selecting the right equipment; including size of the function room, ceiling height, lighting, air walls etc. Our staff prides itself in our experience and level of expertise in this support service. Please be aware that not all of our function rooms are equipped with sound systems, but not all function rooms will even require amplified sound systems due to the size. At the Cape Codder Resort & Spa, we offer a variety of in-house audio-visual equipment, and can also order supplemental equipment through outside sources. Complimentary wi-fi is available through out the property.
