

# CAPE & ISLANDS GREEN

We are proud to announce that we have earned "Level I Verification" from the Cape & Islands Green program.

Cape & Islands Green is helping businesses take their initiatives in "going green" to the next level. As a result of becoming a Cape & Islands Green Verified Business, the Cape Codder Resort & Spa, has reduced energy consumption and costs, cut down on waste in our landfills through recycling and reuse efforts, changed buying practices by switching to environmentally compatible products and educated employees about fuel efficient transportation choices. All of these actions make an impact on our environment.

As local businesses strive to make Cape Cod a "Green Destination", the Cape & Islands Green program is dedicated to helping businesses become successful and responsible by reducing their impact on the natural environment while lowering their operating costs and increasing their competitive advantage. The program was organized by a collective of environmentally conscious business owners, with support from the Cape Cod Chamber of Commerce, the Sandwich Chamber of Commerce and the Community Development Partnership.
